“No holds barred! All-out Tank” is an innovative battle RC tank with which you can enjoy fierce laser tag battles and unrestricted and complex maneuvers made possible by unique Special Wheels. The main unit, whose entire length is approximately 210 mm, is equipped with Special Wheels that enable unrestricted and complex running. **The tank can not only run forward and backward, but also slide to the left and right.** By combining the lateral and longitudinal running, it can also run at a right angle. The unique maneuverability of the tank is quite innovative, with its powerful and agile motion even when running while dodging obstacles.

The product includes two main units in a set, which allows for two-player battles in the Battle Mode. Furthermore, using **the Autonomous Mode for running a tank autonomously, you can also enjoy fierce battles by yourself.** Lighting and sound effects are activated when firing lasers and getting shot, hyping up the fully-fledged laser tag battles even more.

The BACHI-CON RC series features RC toys with astonishing and exhilarating gimmicks for playing your heart out in exciting battles. All-out Tank will be released as the second product in the series, following “Butto Buster” (released on June 26, 2021). Being different from robot-type RC toys, this vehicle-type RC toy is perfect for all generations from children to adults.

*) RC: Abbreviation for remote control

Features of the Product

★Unique Special Wheels to enable unrestricted and complex running★

Special Wheels, each of which is equipped with eight smaller wheels, enable the tank to run both longitudinally and laterally, achieving free and complex movements.

◆Slide running

With just a single button on the controller, the tank can easily make slide running straight to the left and right. Combining this with forward/backward running allows the tank to run at a right angle.

◆Superspeed 360 spin

By pressing and holding the control switch to the left or right, you can control the action with counter-clockwise or clockwise superspeed 360 spins.

★Laser tag battles★

The rules are very simple. The player who hits the opposing unit's weak spot (the rear of the main unit) with laser three times wins. A unit that has been shot stops moving, and trembles to let the players know it has been hit. The main units are equipped with lighting and sound effects as well as responsive movements, which activate when the units are powered up, when they fire lasers, and when they are hit to hype up the battle.

◆You can enjoy battles with someone else or by yourself!

In addition to two-player games with each player using a unit, you can also enjoy single-player games using the Autonomous Mode, in which the opposing unit becomes an autonomous moving target for approximately 60 seconds. Furthermore, you can play multiplayer games with up to eight units.

Product Outline

Product Name: **“No holds barred! All-out Tank Laser Battle Set”**

SRP: JPY 8,690 (tax included)

Launch Date in Japan: Saturday, November 27, 2021

About BACHI-CON RC

BACHI-CON RC is a series of RC battle toys with a focus on battles and controls. With astonishing and exhilarating gimmicks and easy maneuvers, you can play your heart out in exciting battles in multiplayer mode with your family and friends or in a single-player mode.

■ BACHI-CON RC First Product

“ButtoBuster Battle Set”

SRP: JPY 6,930 (tax included/on sale)

“Butto Buster” is a combat robot with which you can enjoy fights with exhilarating gimmicks by operating them with punching moves while holding 2.4 GHz wireless controllers in both hands. When you hit your opponent’s weak spot and knock them out, the pilot is blown off in the air. This surprising gimmick clearly indicates the outcome of a fight and adds to the fun of the battle.
